

Changelog

2026-01-19

- Initial workspace created

2026-01-19

Remove legacy Manus OAuth/login flow from the SPA; remove login redirects and auth gates; keep UI runnable in no-auth mode (build+tsc pass; vite dev server bind fails in this environment with EPERM).

2026-01-19

Hygiene: ignore local sqlite artifacts; seed docmgr vocabulary for ticket metadata; mark validation task complete (dev server bind EPERM noted).
